MARKET BLOWS THE ROOF OFF TO END THE YEAR

2019 4th Quarter & Year-End Report

First Published in the The Carmel Pine Cone on January 31, 2020

By: Paul Brocchini & Mark Ryan

It is lucky we are blessed with ample humility. In our Third-Quarter Report we suggested the numbers indicated a weakening market: so much for prognostications. The fourth quarter sizzled: a 45% increase in dollar volume over the same quarter last year, a 22% increase in the number of sales, and, amazingly, the second highest number of quarterly sales, 270, in the year, surpassed only by the second quarter which logged 272 sales.

This is highly unusual. The second quarter almost always tops the activity chart and the 4th quarter is usually the weakest. Who saw this coming? We didn't, and we study this stuff all of the time.

If you have been keeping up with local news, you probably know that there were two block-buster sales in Pebble Beach during the quarter, one for \$24 million and the other for \$21 million. Even backing out those \$45 million from the gross sales amount, you still have substantial increases: up 30% in gross sales for the eight markets surveyed in the quarter and up 99% in Pebble Beach.

Fourth Quarter Median Sales Price Comparisons

Prices, on the whole, were steady with exception of Carmel Highlands and Pebble Beach. Four markets had increases, led by Pebble Beach with a sharp increase of 40%, while the other four were down a bit led by the Highlands which dropped 70% as the universe of sales in that tiny market was at lower prices than last year.

Ten Year Charts

Median Sales Prices: At the end of the year we prefer to look at the annual numbers which provide a better look at the nature of the current market. As in the fourth quarter, the numbers show a mixed result: three markets up, three down and two unchanged. On balance it is safe to say that median sales prices were basically stable in 2019.

Gross Dollar Volume: Gross dollar volume slipped a bit in 2019, off four percent from 2018. Three markets had gains led by Carmel-by-the-Sea, up 19%, followed by Pacific Grove, plus nine percent and Pebble Beach, up eight percent.

The ten year gains are impressive, but we must temper our enthusiasm with the realization that the base year, 2009, was a down year in the middle of the great recession. With that in mind let's savor the two markets with 100% or better gains over that decade: Pacific Gove, 100% and Pebble Beach a truly whopping 357%. The eight markets as a whole were pus 233%.

Affordability

The decreasing affordability of Monterey Peninsula real estate persists and worsens. Please review the **Distribution of Sales Chart**. We did the math and discovered that of the 270 sales 140 or 52% were above one million dollars. How daunting is that to young, first-time buyers?

Market Barometer

Our Barometer, which displays the percentage of listings in escrow, is our best forward-looking tool. On January 1st the Barometer, for the most part, was strong: Carmel-by-the-Sea with fully 30% of the listings in escrow; Carmel Area 25%, Monterey Area 30%, Pacific Grove 29%, Seaside 41%. Surprising, at least to us, was the extremely weak reading in Pebble Beach, a meager five percent. Maybe the Forest is taking a break after the amazing 4th quarter. On the whole, the Barometer points to a strong first quarter.

So there you have it. The boom continues in spite of some negative tea leaves in the recent past.

Paul Brocchini and Mark Ryan are real estate agents with Carmel Realty Company, NE Corner of Dolores & Eighth, Carmel-by-the-Sea. They can be reached at (831) 238-1498 (Mark) or (831) 601-1620 (Paul).

The charts are based in whole or in part on data supplied by the Monterey County Association of Realtors' Multiple Listing Service (MLS). Neither the Association nor the MLS guarantees or is responsible for their accuracy. Data maintained by the Association or its MLS may not reflect all real estate activity.
